Franca, São Paulo, Brazil | Relocating to Toronto, ON — August 2026 | Open to remote/hybrid
+55 16 99350-3223 | eduardorm.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Front-end/full-stack developer with 3+ years of experience building and customizing e-commerce and business websites for clients across Brazil. Skilled in HTML, JavaScript, PHP, and C# (MVC), with hands-on experience in Bootstrap, Tailwind, and WordPress/WooCommerce. Recently incorporating generative AI tools (Claude, Lovable, Ollama) into web development and design workflows. Comfortable communicating directly with clients on requirements, timelines, and budgets. Relocating to Toronto in August 2026 and looking for a front-end or full-stack role.

TECHNICAL SKILLS

- Languages & Frameworks: HTML, CSS, JavaScript, jQuery, JSON, PHP, C# (MVC), React
- CSS Frameworks: Bootstrap, Materialize, Tailwind CSS
- Back-end / Data: SQL Server, Clean Architecture principles
- CMS & E-commerce: WordPress, Elementor, WooCommerce, Irroba, Shopify, Shopee, Magalu, Mercado Livre
- AI Tools: Claude AI, Lovable, Ollama — applied to web/site creation and interface design
- Marketing & Analytics: SEO, Google Analytics, Google Tag Manager, Google AdSense
- Other: Microsoft Office
- Languages: Portuguese (native), English (advanced)

PROFESSIONAL EXPERIENCE

Entrepreneur / Owner

2025 – Present

Dragon Burger — Franca, SP

- Founded and manage a fast-food burger restaurant, handling menu development, supplier management, iFood platform integration, marketing, and daily operations.
- Built the brand from scratch, achieving consistent growth and positive customer reviews on iFood.
- Ran digital marketing campaigns using Meta Ads to drive customer acquisition.

Full-Stack Developer (Independent project, not yet incorporated)

2026 – Present

Igor la Tecex Soluções em Tecnologia LTDA

- Built and developed `rpgtokensforgeai.com`, a project tied to the RPG/generative-art space.
- Used generative AI tools (Lovable, Claude AI) to accelerate site and system development, including interface design.
- Working with the company since 2026, ahead of its recent official incorporation; engagement not yet formalized under a contract.

E-commerce Operations

2025

Eletrônica Castro — Franca, SP

- Managed product listings and inventory in the sales system.
- Managed marketplace accounts and listings (Magalu, Mercado Livre).
- Handled customer service for orders and product questions.

Front-End Developer Intern

04/2023 – 09/2024

Irroba — E-commerce Platform

- Built and customized client storefronts on Irroba's e-commerce platform, developing new front-end features and layout options.
- Worked primarily with PHP, JSON, jQuery, Bootstrap, and Tailwind CSS.
- Liaised directly with clients to scope site requirements, timelines, and budgets.

WordPress Developer (Freelance)

2022 – 2024

Mundo Artificial, Waezor

- Designed and built websites from scratch using WordPress and Elementor for small-business clients.
- Implemented SEO tooling, including Google Analytics, Tag Manager, and AdSense.
- Set up WooCommerce for client online stores.

Intern → Junior Full-Stack Developer

2021 – 2022

LCS-I

- Developed a C# MVC sales system and the company website (HTML, CSS/Materialize, PHP).
- Worked with SQL Server for basic data storage and queries.
