LETTER OF RECOMMENDATION

To whom it may concern,

I, Igor Pereira Alves, managing partner (sócio-administrador) of Igor Ia Tecex Soluções em Tecnologia LTDA and also of Mundo Artificial, am writing to recommend Eduardo Roberto, with whom I have worked since 2026 on web development projects.

Eduardo was responsible for building and developing WordPress websites for our projects, handling everything from initial page structure to the customization of themes, plugins, and features tailored to each business need. His work included layout configuration, performance optimization, and front-end adjustments to ensure a good user experience across devices.

Beyond WordPress development, Eduardo brought generative AI tools into the development process, notably using Lovable for rapid site and system creation/prototyping, and Claude AI to support development and interface design. This combination allowed us to deliver projects faster without compromising technical or visual quality.

One of the main projects Eduardo led was rpgtokensforgeai.com, a platform focused on generating RPG tokens and visual content with AI support. On this project, he worked on both the site's development structure and the user experience design, using the AI tools mentioned above to speed up content and feature creation.

Throughout our working relationship, I observed the following qualities in Eduardo:

- Commitment and initiative in delivering projects, even under an informal, early-stage arrangement as the company was getting established;
- Strong problem-solving skills and a willingness to quickly learn and apply new AI tools within the development workflow;
- Solid command of WordPress, including theme and plugin customization and site structure;
- Clear, organized communication regarding project status, timelines, and technical decisions;
- Attention to the quality and polish of delivered work, both technically and visually.

I recommend Eduardo Roberto without reservation for front-end or full-stack development positions, and have full confidence in both his technical ability and professional conduct.

I am available to confirm the information in this letter by phone or message, using the contact details above.

Sincerely,

Igor Pereira Alves

Managing Partner — Igor Ia Tecex Soluções em Tecnologia LTDA / Mundo Artificial
